

Unleashed & Magento 2 Connector

Updated 5th January

You can install this extension using the Magento Marketplace or if you would like us to install you can select this as an option when purchasing the module. Should you wish to purchase this service at a later point you can [purchase here](#).

For support please email - support@landdigital.agency

Configuration Options

You will need to enter your Unleashed API details for the sync to work, you will find these in your Unleashed account

Integration > Unleashed API Access

Integration

Unleashed API Access

Unleashed API

The Unleashed API is linked to the Unleashed web application. You will need to create an account there before you can use the API. Demo accounts are also allowed to access the API. Use the [API Sandbox](#) to try out accessing and updating your Unleashed account via the API. Your username and password for the API Sandbox will be the same username and password that you chose for the Unleashed application. A sample application that consumes the API can be downloaded [here](#).

Your API Id:

f6ce19ca-db5a-4084-a959-53e8804fc7d7

Your API Key:

t8zu1y3jDDQNAAWCezwdkeMCGPgPILRURKeuZRd3pAw3W42E5beziZvgwOGjGlc8nFeUGgwPRtYckR97w=

Magento Configuration Options

You can find these options:

Store > Configuration > Unleashed

API ID & API Key

You will find these within Unleashed as described above

Warehouse

If you are operating multiple warehouses you can select which warehouse orders should be sent to and inventory managed from. Note you can only select one warehouse.

Sync Time

From here you can select how often your Magento store will sync with your Unleashed account

Sync SOH

Every time a product inventory is updated within you can choose whether or not this is reflected within your Magento store, we would recommend this setting is 'YES'

Guest Customer

This option allows you to decide if a new customer account is created with a guest checkout or if all guest account sales should be allocated to one guest account.

Sync Order Status

If selected 'Yes' the extension will mark the order as complete within Unleashed when dispatched from Magento reducing any duplication. The selection of this option will be dependant on your workflow.

Note: If an item has no available inventory it cannot be completed within Unleashed.

Set Product out of Stock

There are three options to choose from:

- Never set a product out of stock
- Set out of stock when available quantity is 0
- Set out of stock when inventory is 0

Sync Log

This area will provide you with an overview of objects synced and if any orders have failed. Syncs happen once an invoice has been raised and will sync with Unleashed at your pre-selected time interval.
